No shame in admitting I am still a racing sim noob, HOWEVER I find immense enjoyment in learning how to drive fast. This sim has an extensive racing school to teach you everything you will need to know in order to be competitive on the track, it has a magnificent selection of GT cars (Lamborghini, Ferrari and Maserati, yum yum), and it still looks really really good for a title that is almost 10 years old. A must-have for every sim fan out there. 10/10 would keep on trying to learn how to race with an old, sub-par wheel.. This game is still one of the most enjoyable racing sims around. Graphics are old but you don't really notice it when driving. Only the lack of dynamic cockpit shadows is a real minus. The physics and insane amount of modded content keep this one alive year after year, or decade after decade even.. I love this game. I play this game all the time single player. I guess the activity meter doesn't count that. I found something fantastic I want to share with everyone. I found out how to unlock the inner roads and castle areas of the Nordschleife track. Background: Get the track: Nordschleifev09forGTR2.rar . In file Specialfx.tec in the Roads section in Materials add rdtahill in the Low Grip Roads in Materials add rdtarally,grasoldb,oldbbian You can now drive on rally sections in the interior of the 13 mile main circuit.. GTR 2 Is A mix Between Arcade and Sim But more on the Sim Area. once You first Download the game the Porsches And the Ferrari's will not have a skin. their Is a Walkthrough which will tell you how to get it working. The Game is for the Endurance Racing junkies with The 24 hours Of Spa Being One of the Events you can and will take part in. This game Is as Easy to mod As Rfactor but Some mods may Break the game. the Mod I would Recomend will be grid mod-Brings ALMS Le mans 24 and LMS alive In this mod With Various Add ons round it. however sadly Its A private mod So i would be a pain getting it. This game Is Fun and is one For the Ages.. This game is old, but still one of my favorite racing games (along with RRRE, Automobolista, GT Legends, Race 07, and Assetto Corsa). Pros: + the cars (2003 - 2004 FIA GT cars) + the tracks + graphics are still look pretty good + good sounds + tons of mods for it + really cheap Cons (mostly minor annoyances): - Had to do some fiddling around with nvidia profile inspector in order for it to look good - The UI is not too great - Had to work some magic in order to get Porsches and Ferraris to show up (google it). - have to run steam as admin in order for the steam overlay to work with this game - have to alt-tab out of the game after startup in order for my G29 to work with it.. So where the fuq did my Ferrari and Porsche go!?! What's worse, we can't even play Ferrari and Porsche from whatever mod it is!. I remember one day, about 12 years ago, when in my school there was a gaming contest taking place. I joined on the spot with my colleague. Quite good PC's (hardware), LAN, keyboards and GTR2 launched. As I had grown up with racing games, I quickly dominated "noob section" and finally finished 2nd at the whole event. My colleague was 3rd. The 1st one was the guy, who played before and completed the game earlier, so he knew the "know how". And I remember a situation, driving Lamborghini, when I hit the grass with car's one side the curve and I was near to spin and lose race. I was spamming and blasting arrow keys to hold my car in straight line and return to tarmac with full throttle. And I did. The "awws" and "Holy he did it" mutterings behind my ears are still priceless to me. Still playing, till today ;) Let it be as a review, just a great game for car racing freaks.. Still the most feature-complete racing sim on the market.
